

Tailored Digital Enterprise Asset Management Solutions

Sopra Steria is revolutionising Enterprise Asset Management through digital technology (D@EAM). Managing assets has become increasingly complex due to technological innovations, increasing security requirements, competition and rising operating costs. Maximising the availability and performance of assets, by optimising processes, is more critical to success than ever before. Today, process managers must make immediate and strategic decisions, requiring effective data analysis capabilities and reporting.

The Benefits of Sopra Steria Digital Enterprise Asset Management Solution

Our Digital Enterprise Asset Management solution facilitates and automates processes, allowing you to respond to tough challenges, such as:

- Gaining greater visibility and better control of assets
- Achieving higher performance of critical revenue-generating assets, by maximizing availability and reliability.
- Addressing complex demands
- Improving accountability, utilization and productivity
- Lowering the total cost of ownership
- Improving inspection and maintenance processes
- Reducing inventory and administrative time
- Standardizing business processes
- Increasing business system integration
- Standardizing and sharing data
- Driving performance levels of service providers
- Spatial enablement to support map-based user interfaces
- Integration with accounting systems, mobile workforce management and design tools
- Connecting and orchestrating data on IoT devices, across devices, or with back-end applications.

Our solution encompasses all the distinctive assets of an organization, including:

- Mobile assets, such as automobiles, trucks, coaches, trains, vessels and aircraft.
- Fixed assets, including buildings, logistic facilities and equipments.
- IT assets, ranging from mobile devices to servers.

The world is how we shape it
